*Introducing the future  
in sorting and material  
handling technology*

*Complete  
technological  
innovation  
in movement*

**Motor Power Company** keeps developing new concepts in sorting and material handling.

Our goal is sharing with the market our domain expertise in intralogistics; innovative solutions through our gearless and geared technology products. We propose motion control bundles composed by gearless motorollers and smart drives.

All our solutions are in-house developed and are particularly oriented for control, movement, storage and protection of materials and products throughout manufacturing, sorting, warehousing, distribution, consumption and disposal.

**Motor Power Company** specialises in the design, development and manufacturing of high performance industrial motion solutions. We have acquired consolidated expertise and technical know-how from 30 years experience with all kinds of applications and through our continuous commitment to research and development.

This allows us to partner leading international companies in the supply of products and solutions for automation and motion control.

# GEARLESS MOTOROLLERS AND DRIVES

## Increased efficiency and limitless performances

**Motor Power Company** introduces these perfect matched bundles constituted by gearless motorollers and smart drives. Everything has been conceived as a specific product for conveyor, crossbelt or any roller transfer systems.

Two versions are proposed; frameless cartridges without tube, to be inserted into the roller to be moved, and power pack version, a ready to use motoroller embedded in its own tube. The technology on which the motor is based comes from the direct drive torque motors. Consequently, the motion is transmitted directly from the motoroller to the load, without any gears.

### Motoroller without gears ensures:

#### > HIGH MTBF

as the motoroller needs less components than the standard kinematic chain

#### > SYSTEM EFFICIENCY INCREASE

due to the absence of gears inside the motoroller

#### > ACCURACY

due to the feedback reliability

#### > HIGH DYNAMIC

thanks to the direct drive technology

#### > EASY REPLACEMENT

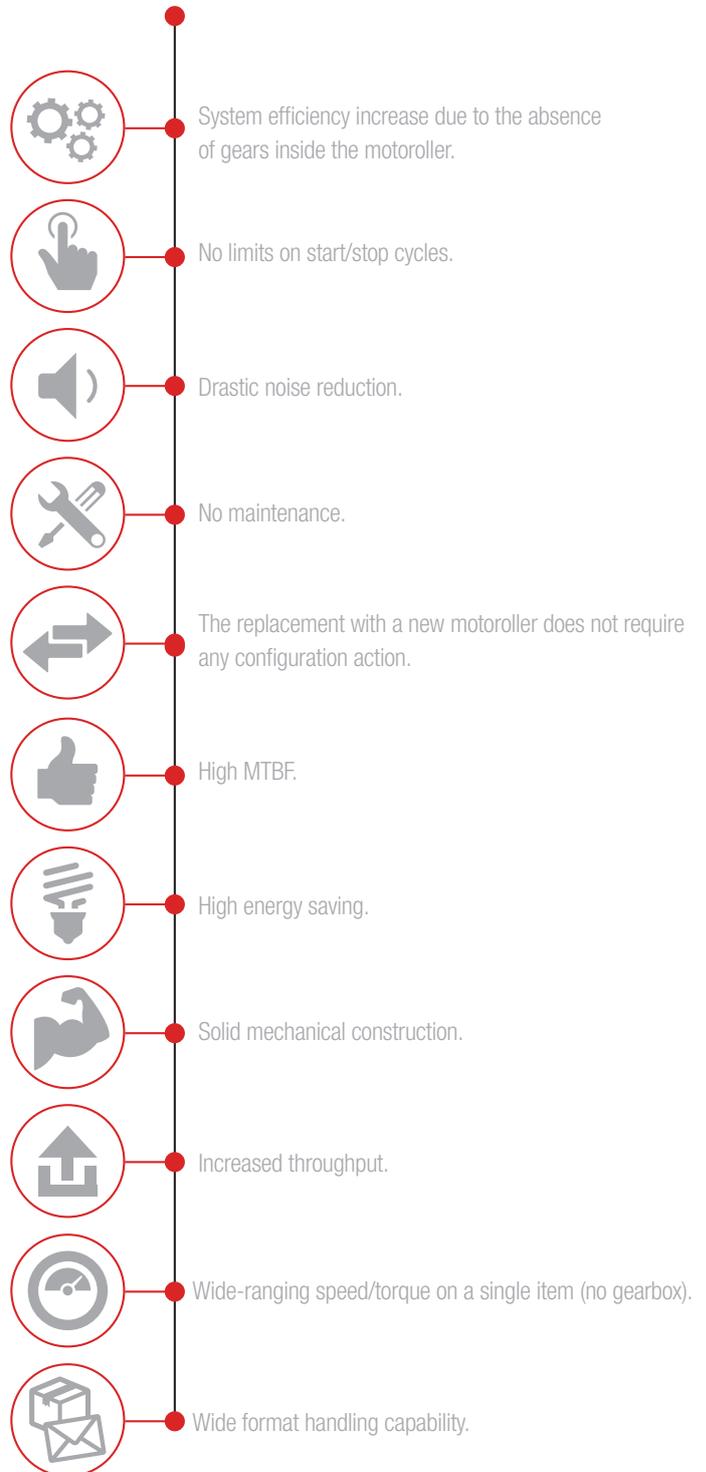

with the autotuning system of DMR Drives, the substitution with a new motoroller does not require any configuration action

#### > EASY COMMISSIONING

due to a unique part number, there are no different gearbox ratios to handle according to different speed needs

#### > WIDE SPEED AVAILABILITY

one motoroller for all speed range
